

Economy Germicidal UVC Lamp ER-UV14-24V

*24 Volts
55 MicroWatts*

The Germicidal UVC Lamp Model ER-UV14-24V is a whole house air purification system that installs directly into the central heating and cooling system ductwork or plenum. The ER-UV14-24V is available with a 14" lamp and produces an output of 55 microwatts to neutralize airborne pathogens such as bacteria, viruses and mold.

According to the EPA, the combined use of filtration and germicidal UVC light is an effective means of preventing the distribution of airborne viruses in occupied spaces.
